

RED HOT DELIVERY

Commercial Water Heater Delivery

Red Hot Delivery is an extension of your commercial water heater service. We're there when you need us – saving you precious time. Our included special handling service allows you to **install with only one contractor!**

Call us to schedule a delivery time when you will have the old heater drained and disconnected. We will remove the old heater, unbox and place the new heater in a specified location.

The owner will be impressed with the speed and efficiency of your install and that will win you more business.

We also service what we sell!

**RED
HOT
DELIVERY**

Whether it's a new installation or a commercial heater replacement we will deliver when you need it. We have specialized equipment to handle the largest and heaviest units. Down in a basement or in a tight mechanical room? Let us sweat the details.

If a replacement, please have the existing heater drained and disconnected by the time you request delivery. We will remove the old, limed-up heater and dispose of it in an environmentally friendly fashion. We will then use our specialized equipment to set the new heater in place so all that is needed is to reconnect the water, gas or electrical connections. This saves you precious labor resulting in more profit for you and cost savings to your customer. This special handling service allows the installation of commercial units with only one installer.

▶ **What are the delivery costs for Red Hot Commercial Water Heater Delivery that includes special handling service?**
